Greenwood Drive Waterline Relocation and Storm Sewer Replacement Project

Re: Design/Permitting/Construction Consulting Service

The Engineering Department requested and received quotes for the site design, permitting and construction consulting services for the Greenwood Drive Waterline Relocation and Storm Sewer Replacement Project.

The scope of this proposal includes field survey, design drawings, plans, specifications, meetings, stream restoration, permitting, cost estimate, easements and construction consulting services. The Township requested quotes from the following:

PVE, LLC	\$36,500.00
Herbert, Rowland & Grubic, Inc.	\$93,550.00
Gannett Fleming, Inc.	\$93,800.00
Whitman, Requardt and Associates, LLP.	\$115,100.00

I have reviewed the Scope of Services and have determined that PVE, LLC proposal addresses the requirements for the project. Therefore, it is my recommendation that the Greenwood Drive Waterline Relocation and Storm Sewer Replacement Project be awarded to PVE, LLC in the amount of \$36,500.
