RE: Project justification for Franklin Acres Pump Station (CP-069)

After consultation with staff, I have reviewed the project noted above and recommend the Township Board of Supervisors consider authorizing the Township to enter into an agreement for professional services with Herbert, Rowland & Grubic, Inc, at the proposed cost of \$129,800.00.

If approved this would provide funding for sewage facility planning, preliminary design & permitting as well as final design of a new pump station to replace the existing station. Approximately 334 homes are served by the current and proposed stations. This project will ensure superior infrastructure integrity as well as effective service delivery.

Thank you for taking the time to review and consider this request. Funding for this project was considered during the capital improvement planning process. Please let me know if I can answer any further questions regarding this project.
