RE: Project justification for Fox Run By-Pass Sanitary Sewer Design (CP-072)

After consultation with staff, I have reviewed the project noted above and recommend the Township Board of Supervisors consider authorizing the Township to enter into an agreement for professional services with Hatch Engineering, at the proposed cost of \$34,500.00.

If approved, this would be the first step to advance sanitary sewer improvements that will also mitigate stormwater flooding in the area. Hatch Engineering will design approximately 1,200 feet of 15" sanitary sewer by-pass to eliminate a current hydraulic condition. Hatch will also provide E&S details, plan and profile sheets and a bid tabulation.

The proposed project represents the municipality's continued investment in the health of the community and its natural environment.

Thank you for taking the time to review and consider this request. Please let me know if I can answer any questions regarding this project.
